4. Research Focus

Research is focussed on problems of current interest, to obtain modified and optimal design of components pertaining to Aerospace structures, Machine tools, Engines, Mechanical Fasteners etc. Theoretical, experimental and computational studies are carried out in the following areas:

- i) Stress analysis.
- ii) Vibration Studies.
- iii) Optimum Design for refining the existing designs.

AICTE has granted sum of Rs.7 Lakhs under Research promotion scheme for research project titled “ Inverse methods for force identification in complex machines & structures “

5. Industry Linkage

All the M.Tech Students will undergo training for two months in local and other industries. Most of the M.Tech students have undertaken their project works in reputed Industries and R & D Organizations. For facilitating Industry- Institute Interaction an Industry- Institute Interaction Cell has been setup. Recently Industry- Institute Interaction meeting was organized and areas of interest have been identified, such as testing, Calibration, Training, Projectworks, Consultancy, etc..
